

# “DATATAG SECURITY STOPS THEFT”

The No.1 Theft Deterrent for Motorcycles & Scooters

A unique layered approach to crime theft prevention and asset identification

The No.1 Security Marking System

**30** SINCE 1992  
YEAR ANNIVERSARY

# PERMANENT PASSIVE PROTECTION WITH DATATAG

The No.1 Security Marking System - unique multi-layered state-of-the-art technology

**Glass Transponders**

This transponder is roughly the size of a grain of rice. It contains a unique code number which is permanently programmed into its integrated circuit. The number cannot be altered or deleted.

**Flat Transponders**

The flexible flat transponder contains a unique code, permanently programmed into its integrated circuit, which cannot be altered or deleted and is impervious to either electronic or magnetic attack.

**Warning Labels**

Forming a major part of the visible deterrent these indicate to potential criminals that Datatag genuinely protects your machine and there is a high risk of it being traced should they steal it.

**"Stealth" UV Etch**

Comprises a unique code - permanently etched into the panels and fairings. They do not deface or interfere with the appearance or aesthetics of the motorcycle because the etchings are visible under UV lighting.

**Datadots®**

A superior microdot identification system developed for ease of use. The Datadots® can be applied to any surface, thus making it virtually impossible for the criminals to locate and remove them all.

**Forensic DNA**

A unique chemical DNA solution. Each piece of equipment is protected with an invisible and unique DNA code. Criminals will have to be confident they have removed every molecule of Datatag DNA.
